Thought of the Week

Excerpt Taken From "The Power of A Positive Team"

Positive teams communicate and connect. Everyone wants to be a great team, but to be a great team you must make the time to build great relationships. Positivity is the glue in the process of building a powerful team. Me dissolves into we. You can't be isolated. If there is a void, negativity will fill it. Most teams breakdown because of poor communication. Let's get on the bus together. The energy bus. We have grit. We love our team. We love our school. We love our students. We won't give up on them. The more connected we are, the more committed we will be. If we are committed, we will fight for each other. NOT WITH EACH OTHER. We will move together through failure, adversity, and challenges. We before Me:-).....Always!

If I ever go to battle....I am glad I have this army of talented educators behind me:-)

Ashlee
