MATHEMATICIAN OF THE MONTH

Gunner Wilson: Gunner puts all of his effort into his work! He is one of the first to participate in class and is very enthusiastic when it comes to learning.

Ellie McDaniel: Ellie is a great math student. She works hard and takes her time, on all of her work! Practice makes perfect!

HAPPENING IN CLASS...

We are ending the quarter by wrapping up our multiplication skills. We have multiplied with both whole numbers and decimal numbers. We have also been learning techniques to help us comprehend word problems more clearly; since this seems to be a great struggle. Our next step is towards the world of division. We have been preparing for division through our daily review, so we are hoping for a smooth transition.

REMINDERS

Please check your child's agenda and behavior card every night. This will allow you to stay in the loop if they have any academic/behavior issues. We ask that you sign each behavior mark or missed assignment mark so that we know you are aware. If you have any questions regarding any of the marks please contact me or Mrs. Barker.
